

AXIS Q16 Network Camera Series

Outstanding image performance in demanding lighting conditions.

- > Lightfinder technology with extended D1 (768x576) resolution (AXIS Q1602/-E)
- > WDR with dynamic capture at HDTV 720p (AXIS Q1604/-E)
- > Multiple H.264 video streams
- > Power over Ethernet
- > Outdoor-ready model with Arctic Temperature Control

AXIS Q16 Network Camera Series comprises of indoor and outdoor-ready fixed cameras that deliver outstanding image quality in demanding video surveillance conditions, such as poor light or highly variable lighting.

The unique Lightfinder technology makes AXIS Q1602/-E cameras extremely sensitive to low light, effectively allowing the cameras to 'see' even in dark conditions. The Wide Dynamic Range with 'dynamic capture' allows AXIS Q1604/-E to provide homogeneous images, without too dark or too bright parts.

AXIS Q16 Series ranges from extended D1 resolution cameras to 1-megapixel AXIS Q1604 and AXIS Q1604-E cameras, which also provide HDTV 720p video.

Installation is made easy with Power over Ethernet (PoE, IEEE 802.3af), which eliminates the need for power cables. The cameras also have an SD/SDHC memory card slot for storing recordings locally.

The IP66-rated outdoor-ready models, AXIS Q1602-E and AXIS Q1604-E cameras, operate in temperatures from -40 °C to 50 °C (-40 °F to 122 °F) using High PoE. They feature Axis' unique Arctic Temperature Control to pre-heat the camera module for securing start up even at very low temperatures following a power failure.

Low-light sensitive and wide dynamic range cameras for indoor and outdoor use

AXIS Q16 Series offers outstanding fixed network cameras with features to handle demanding application requirements. AXIS Q1602/-E are suitable for environments with poor light conditions, and AXIS Q1604/-E are suitable for surveillance in highly variable lighting conditions.

Easy installation with focus assistant, remote back focus and pixel counter

Setting the focus on AXIS Q16 Series is made easy with the focus assistant, which indicates with a flashing green LED when an image is in focus after manually adjusting the lens. Additionally, it offers remote back focus, which allows the focus to be fine-tuned from a computer. The pixel counter further helps the installer verify that the pixel resolution of an object fulfills regulatory or customer requirements, for example, for facial identification.

Lightfinder technology

AXIS Q1602/-E incorporate Axis' revolutionary Lightfinder technology. The outstanding performance in low light is the result of well-founded decisions regarding the sensor and lens combined with carefully tuned image processing. Compared with any analog or network cameras, the Lightfinder technology will give more life-like colors in low-light conditions. The noise reduction of the Lightfinder technology is vastly improved compared with any surveillance camera on the market, which in combination with the light sensitivity of the sensor gives a superior image quality. Wide Dynamic Range – dynamic capture

AXIS Q1604/-E Network Cameras with 'dynamic capture' offer ideal solutions for surveillance in highly variable lighting conditions, for instance when light comes through a glass window or entrance creating both dark and bright zones. In these demanding scenarios, AXIS Q1604/-E allow the user to easily and clearly identify both people and objects. Wide Dynamic Range with 'dynamic capture' works by acquiring several images with different exposure times. Together with advanced image processing, the result is video with exceptional clarity and sharpness, ensuring that no part of the image is too dark or too bright.

Outdoor-ready models

AXIS Q16-E Network Cameras save installation time and costs since they are ready out of the box for mounting outdoors. The IP66-rated cameras have protection against dust, rain, snow and sunlight, and can operate in temperatures as low as -40 °C (-40 °F). The cameras are powered by Power over Ethernet, which makes installation easy since there is no need for a separate power cable. An integrated dehumidifying membrane eliminates humidity caught in the camera enclosure during installation. The cameras enable easy mounting of an infrared illuminator under the enclosure. They come with a wall mount bracket and a sunshield.
