Introduction

GV-BX2802 is a 2 MP network camera equipped with an automatic IR-cut filter for day and night surveillance. Fixed / Iris lens are optional for the camera for a more comprehensive performance depending on different needs. GV-BX2802 supports H.265 / H.264 video codec to achieve better compression ratio while maintaining high picture quality at reduced network bandwidths. The camera is equipped with a Super Low Lux CMOS image sensor which allows the camera to provide a color live view in near darkness.

Empowered by deep learning algorithms, AI technology distinguishes human and vehicles from other moving objects. Integrated with GeoVision Video Management Software (GV-VMS), it supports AI perimeter protection, real-time alert, playback and more.
