

AXIS P33 Network Camera Series — Indoor models

Fixed domes for any environment with remote focus and zoom

- > Exceptional image quality including 5 MP and HDTV
- > WDR and Lightfinder
- > OptimizedIR
- > Remote focus and zoom
- > P-Iris control
- > IK10 impact-resistant models

AXIS P33 Network Cameras constitute a series of indoor and outdoor-ready fixed domes. These cameras are ideal for unobtrusive video surveillance, day and night, in exposed areas such as city surveillance, airports, railway stations, retail stores, office buildings, museums, schools and university campuses.

AXIS P33 Series offers models with exceptional image quality in up to 5 megapixel, including SMPTE-compliant HDTV 720p and 1080p video. AXIS P33 Series provides multiple, individually configurable H.264 and Motion JPEG video streams.

The HDTV 720p/1 MP models support Axis' Lightfinder technology, which makes these cameras extremely sensitive to low light. AXIS P3384-V that additionally supports Wide Dynamic Range – Dynamic Capture, provides outstanding video quality in the most demanding conditions with strong variations in light. The 5 megapixel model, AXIS P3367-V, can cover a large area with exceptional detail and light sensitivity. All AXIS P33 models support P-Iris control for optimal image clarity.

AXIS P3364-LV incorporates new long-life LED technology that is highly power-efficient. Adjustable in angle and intensity, the built-in OptimizedIR solution offers easy configuration optimizing for the scene.

All AXIS P33 cameras support the remote focus capability that eliminates hands-on focusing at the camera, and remote zoom that allows the camera's angle of view to be optimized.

All AXIS P33 cameras offer digital pan/tilt/zoom and the 2-megapixel, 3-megapixel and 5-megapixel models additionally provide multi-view streaming. AXIS P33 Series has low, environmental-friendly power consumption, supplied by standard Power over Ethernet (IEEE 802.3af).

Fixed domes designed for efficient installation

AXIS P33 Network Cameras are designed for professional video surveillance with easy and reliable installation in focus. Indoor models of AXIS P33 Series are the perfect choice for a wide range of demanding video applications.

Lightfinder technology

The HDTV 720p/1 MP models of AXIS P33 Series incorporate Axis' unique Lightfinder technology. The outstanding light sensitivity, with maintained colors even in very poor lighting conditions, is obtained by a combination of Axis' expertise in image processing, system-on-chip development and selection of the best optical components.

For more on Lightfinder technology, go to:
www.axis.com/corporate/corp/tech_papers.htm

Wide Dynamic Range – Dynamic Capture

AXIS P3384-V that supports WDR – Dynamic Capture is ideal for surveillance in areas with strong variations in light, for instance close to large windows and entrances, where the sunlight creates both very bright zones and dark shadows. AXIS P3384-V enables easy and clear identification of people and objects both in bright and dark areas.

Built-in IR illumination

AXIS P3364-LV features Axis' OptimizedIR technology based on new, long-life LED technology that is highly power efficient. This results in high-quality, low-noise video also when the environment is completely dark.

P-Iris control

AXIS P33 Series features the advanced precise iris control that comprises a special P-Iris lens, together with dedicated software in the camera,

to set the best iris position for optimal depth of field, resolution, image contrast and clarity. Good depth of field implies that objects at different distances from the camera are in focus simultaneously.

For more on P-Iris and iris control, go to:
www.axis.com/corporate/corp/tech_papers.htm

Easy installation

AXIS P33 Network Cameras offer unique installation capabilities including remote focus and zoom. The remote focus feature enables convenient focusing over the network, eliminating the need for hands-on fine tuning at the camera. The remote zoom functionality ensures that the camera's angle of view can be optimized for the area to be monitored. The pixel counter assures that the required pixel resolution is met. Thanks to Axis' OptimizedIR technology, AXIS P3364-LV automatically adapts the illumination angle with the zoom level, which simplifies installation.

Mounting options

AXIS P33 Series offers a wide range of optional kits for indoor installations, for example, for mounting on a pendant, pole or corner. The IP51-rated recessed mount kit protects the camera from condensation and dust that may exist in the plenum space above the drop ceiling.
