## AXIS P8815-2 3D People Counter

## Complete, sophisticated 3D people counter

Combining 3D imaging software and hardware in one device, this people counter automatically counts the number of people passing through a pre-defined counting area. The device generates a 3D depth map for reliable counting even in challenging conditions where there's shadows, strong sunlight, glares, or high volumes of foot traffic. Data from the counter helps you understand visitor trends, allowing you to make informed decisions about your operations. AXIS P8815-2 also estimates occupancy levels in real-time. It's easy to connect two counters for wide area coverage. And, with optional accessories, it can be pendant-mounted or recessed in a ceiling.
