## QUICK START GUIDE

8 PORT EOC BASE WITH POE PLUS

**HIGHWIRE™**  
POWERSTAR BASE 8

## OVERVIEW

HIGHWIRE Powerstar products are designed to enable the transmission of standard Ethernet and POE (Power over Ethernet) over coaxial cables originally installed for analogue video transmission for CCTV.

These devices can be classed as adaptors or media converters. They are typically used where analogue CCTV cameras are being replaced with modern digital network cameras, known as "IP cameras". This permits IP cameras to be installed without having to replace cable and re-wire buildings.

In most CCTV installations, multiple coaxial cable runs will come together at a central point (e.g. equipment room or control room). The Base units are located here. Whilst multiple single-channel HIGHWIRE Powerstar Base units can be used for multiple channels, it is more cost-effective to provide integrated multi-channel units with an internal Ethernet switch, allowing more than one coaxial cable to be connected into the network system per HIGHWIRE device.

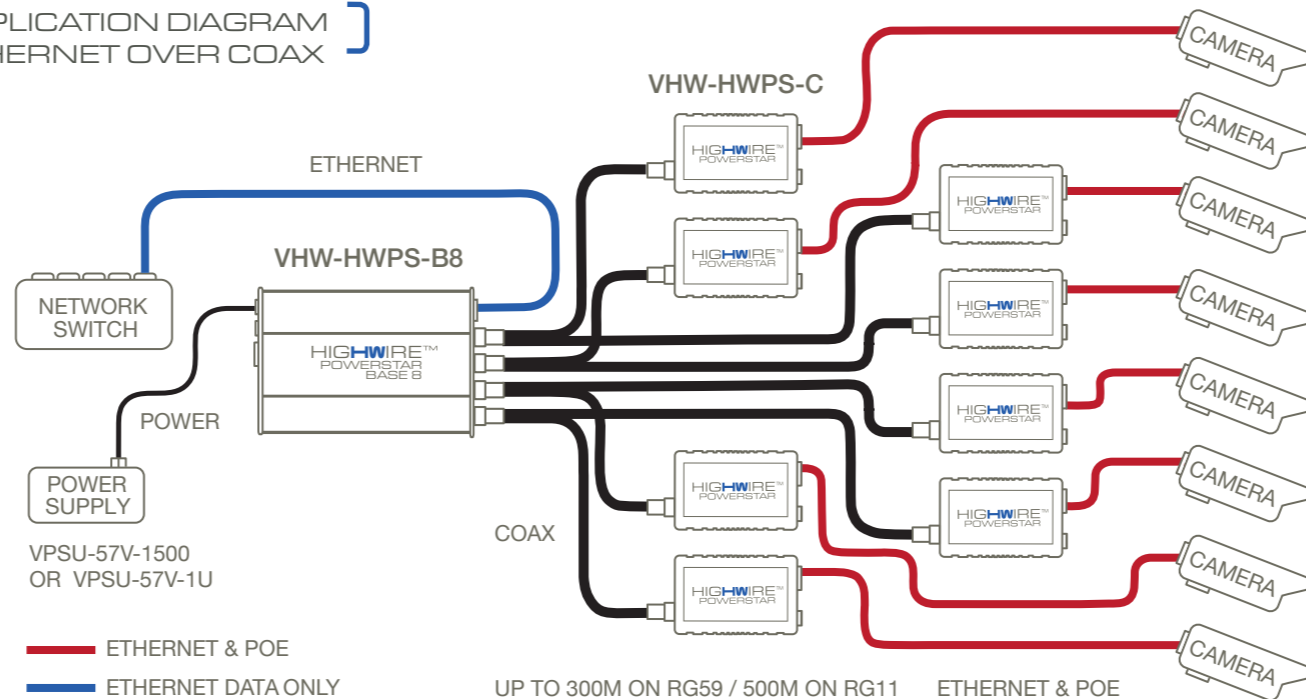

HIGHWIRE Powerstar Base 8 provides eight coaxial cable connections. The Base unit has a single standard RJ45 Gigabit Ethernet port to allow connection to a main network switch. An SFP socket is also provided to allow a fibre network connection if required by the application.

All HIGHWIRE Powerstar Base 8 units must be powered through a DC power connector which is designed for a maximum of 6A at 57V DC.

Either the 1500mA or 8800mA Veracity 57V DC Power Supplies are recommended. The latter allows up to 25W of POE to be delivered to each IP camera connected.

01

## APPLICATION DIAGRAM ETHERNET OVER COAX

## INSTALLATION

Connect the coax cable for 1-8 cameras or POE / non-POE devices to the BNC connectors of the HIGHWIRE Powerstar Base 8 at the switch end.

Connect the coax cable to the BNC connectors of the HIGHWIRE Powerstar Camera units at the camera end.

02

Connect 1-8 cameras or POE / non-POE devices to the RJ45 ports of the HIGHWIRE Powerstar Camera units at the camera end.

Connect the HIGHWIRE Powerstar Base 8 unit to a network switch.

Connect the HIGHWIRE Powerstar BASE 8 unit to your chosen 57V Veracity Power Supply. The installation is complete.

03

## TECHNICAL SPECIFICATION

<b>Power Input</b>	PSU 57V DC up to 6A via a 2 pin detachable screw terminal (supplied) or a 2 pin Micro-Fit power connector
<b>EOC Power Output</b>	Max 25W per port (POE Plus)
<b>Ethernet Interface</b>	Connector type RJ45 Ethernet Gigabit port to allow connection to a main network switch
<b>HIGHWIRE Interface</b>	Connector type BNC 75 Ohm Range Up to 300m on RG59, 500m on RG11 Bandwith 200Mbps (total up + down)
<b>Dimensions</b>	173 x 110 x 40mm (6.8 x 4.3 x 1.6in) inc BNCs
<b>Weight</b>	572g (20.2oz) unpackaged
<b>Compliance</b>	RoHS, CE, FCC, REACH
<b>Temperature</b>	Operating 0°C to 40°C (32°F to 104°F)
<b>Relative Humidity</b>	85% non condensing
<b>Installation</b>	The unit is supplied in an aluminium chassis with rubber feet. It may be used as a stand-alone or may be rack mounted via available accessories.

## IMPORTANT SAFETY NOTES

- | This equipment is designed for indoor use only.
- | If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.
- | Contact details for Sales and Technical Support can be found on the Company website: [www.veracityglobal.com](http://www.veracityglobal.com)
